Subconcussive head impacts in sport: A systematic review of the evidence

Lynda Mainwaring*, Kaleigh M. Ferdinand Pennock, Sandhya Mylabathula, Benjamin Z. Alavie

Faculty of Kinesiology and Physical Education, University of Toronto, Toronto, Ontario, Canada

‘Subconcussion’ is often **inconsistently used, poorly defined, and misleading** in the current research. As a result of the weakness of the current body of research, the overall finding of the review stated there was **insufficient evidence to conclude that repetitive head impacts are associated with neurocognitive impairment**.
